

Apullma Superclean stainless steel product diverter

Hygienic diversion and isolation

The moderate design of our SuperClean stainless steel product diverter avoids edges that might collect dirt and provides access to the easy to clean surfaces, which satisfies the highest hygienic requirements. We develop for you a quality made to measure series of stainless steel diverters. Naturally the feeder and discharger stainless steel conveyor technology is included with our extensive services.

Benefits at a glance

- **Fulfils the highest hygienic requirements**
- **Easy accessible, easy to clean surfaces without dirty traps**
- **Certifiable to EHEDG standards**
- **Matching feeder and discharge stainless steel conveyor technology from one source**
- **Built to customer specifications**
- **Use of stainless steel**
