

Apullma SuperClean stainless steel screw conveyors

For food stuffs as well as damp & aggressive materials

Apart from transporting bulk goods our SuperClean stainless steel screw conveyor can also undertake, for example, mixing or drainage operations. When used with a potato or beet washing machine, it can convey, for example, sand and earth from the wash chamber. In the meat industry, for example, minced meat can be mixed together and transported at the same time.

Benefits at a glance

- **Fulfils the highest hygienic requirements**
