

Apullma's Superclean stainless steel sushi conveyor

Sushi on a moving belt

The stainless steel construction makes our SuperClean sushi conveyor belt robust and provides the hygienic answer for the catering trade and convenience shops. The format and length of the rust free stainless steel construction can be individually customised, so that the sushi conveyor belt fits ideally into various restaurant concepts. The hygienic design, without any edges that might collect dirt, is easy to wash.

Benefits at a glance

- **Fulfils the highest hygienic requirements**
- **Robust and rust free stainless steel construction**
- **No edges that might collect dirt, easy to clean**
- **Individually customised in form and length**
- **Use of stainless steel**
