

## Apullma's Picking Tables and Roller Conveyors

# For seated or standing sorting

The Apullma picking table and roller conveyors are delivered as seat or stand models with infinitely variable tempo control. The robust construction from high quality PVC, or stainless steel rollers, makes the Apullma picking table durable and safe for sorting food, e.g. particularly peeled goods, possible. Apullma produces the picking table and roller conveyor in customised working widths, lengths and conveyor speeds for precise integration in the upstream and downstream processing procedures.

### Benefits at a glance

- Customised working widths and lengths for sorting seated or standing
- Infinitely variable speed control restriction
- Durable powder coating or stainless steel models, particularly hygienic
- Designed to the current hygiene standards (FDA, USDA, 3-A, QHD)
- High quality PVC or stainless steel rollers, also rubber covered as an option
