

Apullma potato washing plant

With infinitely variable controllable washing drums

Irrespective, if you are a farmer looking for a simple potato washing machine, or a food processor in need of a high performance cleaner with integrated sludge cleaner for thousands of cubic meters of potatoes per week, the robust potato washing machine, from Apullma, overcomes difficult demands and can be individually adapted for different crops. Additionally we produce mobile washing plants for cleaning directly on the field.

Benefits at a glance

- **Special robust stainless steel construction for the most difficult requirements.**
- **Individually adaptable for different crops**
- **Also produced as a mobile plant**
- **Components: pitting, washing, brush wash, roller dryer and picking belt**
- **Customised to specific dimensions**
- **Integrated washing water recirculation with sludge water disposal**
